

Hello Everyone,

My name is Radhika Balasubramanian, mom to two beautiful children. Storytelling has been a passion since my younger days, and special needs kids have a special place in my heart. To work with special needs kids everything needs to be improvised and exaggerated. And also need to add some extra efforts to make it interactive. I have learnt to use props and other techniques with years of parent training for my kid.

Listening to stories may help

- i) master the language
- ii) increase attention span
- iii) improve listening skills
- iv) widen the door of curiosity & creativity which is natural to kids
- v) a touch on emotions and feelings

My focus during the sessions is to improve socialization, interaction, and definitely have some fun.

With my bachelor's in psychology and specialization in Applied Behavior Analysis, I am trained to use reinforcement techniques and bring in social and emotional learning. I will be including storytelling props, songs, and reinforcement techniques as aides to make it more interactive.

There is no fee to attend the half-hour virtual storytelling session and is for children of age groups between the ages of 3 and 13.

Appreciate any comments or feedback in the WhatsApp group.

Thank you Loving Hearts for All, for this virtual outreach program!!

Radhika Balasubramanian
